References

References may be *cited* in the text either by number (preferred) or by author/year¹. The reference list should ideally be *sorted* in alphabetical order, even if reference numbers are used for their citation in the text. If there are several works by the same author, the following order should be used:

1. all works by the author alone, ordered chronologically by year of publication
2. all works by the author with a coauthor, ordered alphabetically by coauthor
3. all works by the author with several coauthors, ordered chronologically by year of publication.

The recommended style for references² is depicted in [1,2,3,4,5].
